A E C T R A C K S Y S T E M

A site fabricated stretched fabric wall system for aesthetic appeal, enhanced speech clarity, and reduced interior (unwanted) noise. Every installation is a custom blend of components assembled on-site to the design requirements.

- Comprised of 3 components: tension track, performance core, and face material
- Multiple thicknesses, reveals, profiles, and finish options
- Highly customizable for aesthetics & desired function (acoustics, tackable, magnetic, high impact, reflective)
- High NRC rating of 0.80 using 1" thickness
- Easily retrofit and repairable
