

FAQS

BANQUETTES

What exactly *are* banquettes?

- Banquettes are typically built-in seating. This ranges from a simple booth at a restaurant to a complex curved seating structure with built-in planter and integrated power in a Class AA office lobby.

Do you fabricate custom banquette seating?

- Yes. We design and build custom turnkey banquettes tailored to your space, layout, and design specifications.

What materials can be used for banquettes?

- Banquettes can incorporate wood, metal, foam, and upholstery in a wide range of fabrics or leathers.

Can we use our own or designer-specified fabrics?

- Absolutely. We regularly work with client-provided or designer-selected materials.

Are your banquettes built for commercial use?

- Yes. Our banquettes are constructed for durability and code compliance in high-traffic commercial environments. However, we are not limited to commercial spaces, as we build for select private residences and other environments.

Are your banquettes all built-in?

- No, not all. We can build residential style sofas and other seating solutions with finished backs for a custom look that fits into your FF&E package. We are a full shop that builds to spec – all orders are custom.

Do you manufacture your own fabrics?

- No. We use designer specified fabrics from all major brands.
