

FAQS

EUROSPAN

What is the difference between Eurospan and other stretched fabric systems?

- Eurospan is designed for widespan seamless coverage up to 16' across ceilings.

Are stretched fabric systems acoustic?

- Yes. With a typical NRC rating of more than 0.8, stretched fabric systems deliver an effective acoustic solution that is easy to retrofit or repair if needed.

What colors or textiles can I use with this system?

- Eurospan is available in five popular colors.

Are stretched fabric systems removable or accessible?

- Yes. We can install an access panel, allowing access to lighting, HVAC, or infrastructure behind the surface.
