

FAQS

CUSTOM FABRICATIONS (NIC)

What does “custom fabrication” include?

- Custom fabrication includes specialty architectural elements built to unique design specifications. These are the elements you can’t simply buy off-the-shelf and install.

What materials can be used?

- We work with wood, metal, fabric, leather, and composite materials.

Do you collaborate with architects and designers?

- Yes. We work closely with design teams from concept through installation, including assisting with budgetary pricing and logistics early in the process.

Can custom fabrications be integrated with other systems?

- Absolutely. Custom elements can integrate seating, acoustics, lighting, branding, and other architectural features.
